

## ACOUSTICAL BAFFLES TYPE II & TYPE III

A Type II (Fold-Up) acoustical baffle is comprised of a core of two pieces of lightweight, dimensionally stable glass fiber. All faces and edges of the baffle are covered with a fabric finish. Type II baffles can have square, bevel, or radius edges and corners. Similar to Type I baffles, the Type II baffles can be utilized in place of ceiling or wall panels or for additional acoustical absorption in existing spaces.

A Type III (Back to Back) acoustical baffle is similar to the Type II and is used when the combination of baffle size and width will not allow a continuous fabric wrap. A seamless bottom is not possible with the Type III baffle. Edges can be square, radius, or bevel, or square with radius corners. Maximum baffle size is 4' x 10'.

Thickness	NRC	Mounting
1-1/2"	0.75-0.85	D-Rings
